

LUNCHBOX FRIENDLY

UNCLE TOBYS

No Nut Recipe Fact Sheet

We understand you may be wondering about our recent
UNCLE TOBYS Muesli Bar recipe change...

We have removed nuts across our entire UNCLE TOBYS Muesli Bar range, which is now labelled as '*Lunchbox Friendly*' in new-look golden packs.

Facts about the change:

- We haven't had **peanuts** in our UNCLE TOBYS Muesli Bar recipe since 2008.
- We have recently **removed the almonds** from the recipes across our entire UNCLE TOBYS Muesli Bar range – look out for our new "Lunchbox Friendly" golden packs in store as we make this changeover.
- We have **removed the nuts from our muesli bar factory**, in a process that took over six months. This included a complete shut-down for a week so we could pull apart equipment for intensive cleaning.
- As a result of our commitment to removing nuts from our factory and from our muesli bars, we have deleted the following products from our range; *UNCLE TOBYS Nut Crumble Crunchy, UNCLE TOBYS Almond, Cinnamon & Honey Omega-3 Bars, & UNCLE TOBYS Almond & Honey Oat Slice*. Stores will still have some of these products as we changeover to the new "Lunchbox Friendly" packs with the 'no nut recipe'.
- To make this all work smoothly we worked closely with suppliers to understand their sourcing and any potential for nut contact.
- **Why don't we call our bars 100% nut free?** Although we have removed all of the nuts from our recipes and from our snacks factory, it is not possible for us to be 100% certain that all the other ingredients we buy to make our muesli bars have not come into contact with peanuts and tree nuts before they reach our factory. That's why we are not saying our bars are 'nut free'. If you have an allergy and are unsure about whether you can consume our muesli bars **please always check first with your health care professional** as people with allergies can have differing levels of sensitivity. Like any new product that you try, please always carefully read the nutrition information panel and ingredient lists as well to ensure this is the right product for you and your family.

The good news is that all UNCLE TOBYS Muesli Bars are now "Lunchbox Friendly".
This means:

- The new 'no nut recipe' across our new "lunchbox friendly" muesli bar range has been developed without nuts as an ingredient and without nuts in our factory. So UNCLE TOBYS Muesli Bars can go back into the lunchbox as a healthy and fun lunchbox snack.
- No artificial colours or flavours.
- Goodness of wholegrains.
- Great tasting and nutritious lunchbox snack option.
